

## Luna Duo-tec

- Digital control panel with back-lighted LCD display
- Wide modulation ratio up to 7:1 better efficiency thanks to reduced switch-on/switch-off of the boiler
- Gas Adaptive Control (GAC) system: combustion automatic control to maintain constantly the highest level of efficiency
- Modulating circulating pump
- Complete soundproofing of the generator
- Frontal access for advanced diagnostics
- Integration with solar system option

**Diagnostics**  
on the control panel there is easy access for the diagnostics. With a USB connection it is possible to check single boilers or multiple boilers functions.

**Modulation ratio**  
the modulation system is able to adapt the heat output to the energy demanded by the building.

### Hydraulic system

- 3 way electric diverter valve (also heating only models)
- Stainless steel AISI 316L premixing burner
- Stainless steel AISI 316L water/flue heat exchanger
- Stainless steel enhanced DHW exchanger to ensure condensation also in DHW mode
- Modulating fan with electronic speed adjusting system
- Automatic by-pass
- Modulating low energy pump of the heating circuit with built-in air vent
- System to prevent pump and diverter valve sticking operating every 24 hours
- Central relief valve set at 3 bar

### Thermoregulation system

- Built-in climatic regulation (outdoor sensor available as optional)
- Control of multi-zones system option

### Control system

- Overheat limit thermostat of the water/flue exchanger
- Hydraulic pressure switch to prevent boiler operating in event of low water
- Safety NTC sensor against flues overheat
- Electronic temperatures control by NTC sensors
- Full anti-frost device
- Electronic thermometer
- Digital heating circuit pressure gauge
